## PROFILE

With 8+ years of experience in roles ranging from Application Support Engineer to Web Administrator and Data Engineer, I have a strong foundation in ensuring the smooth operation of applications, optimizing web systems, and harnessing data for insights. In the last 2+ years, I transitioned to DevOps, mastering the art of automation and continuous integration. I now seek new opportunities to apply my diverse skill set and cross-functional expertise to innovative projects.

## EXPERTISE

- Kubernetes
- Docker
- Troubleshooting Abilities
- Apache Tomcat and HTTPD
- UNIX Shell and Windows Batch Scripting
- Security Configuration Management
- Runtime Environment Setup
- Data Management in Oracle, MySQL, and SQL database
- Agile / Service Now Platform (ITIL Framework)

- Cloud
- Jenkins
- Terraform
- Prometheus
- Bitbucket
- Ansible

## EXPERIENCE SUMMARY

Tata Consultancy Services, Cloud Support Engineer | 2018 – Current  
 Wipro Technologies, Application Support Engineer | 2013 – 2018

## EDUCATION

M. Tech in Software Engineering from BITS, Pilani | 2016  
 Bachelor of Computer Applications from WBUT | 2012

## ACHIEVEMENTS

- Appreciated by business key user from Lexmark for successful infrastructure & data migration.
- Star performer award as a certificate of appreciation from TCS.
- Excellence performer award from Wipro.
- Ranked as third position in Bachelor's in Computer Application(BCA).

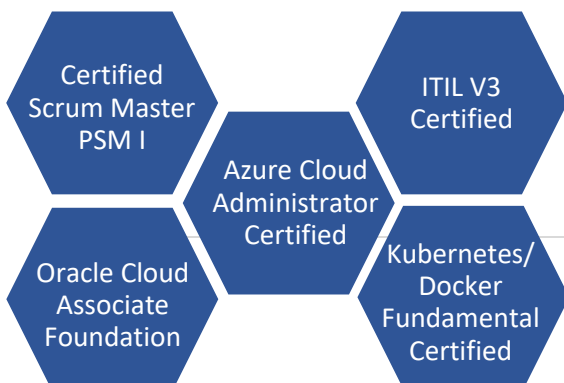

## BUSINESS SKILLS

## EXPERIENCE

Client **Lexmark** Oct 2021 – Till date  
 Role DevOps Engineer  
 Org. **Tata Consultancy Services**  
 Description Lexmark was formed on March 27, 1991 when investment firm Clayton & Dubilier completed a leveraged buyout of IBM Information Products Corporation, the printer, typewriter, and keyboard operations of IBM.

- Orchestrated and managed containerized applications using Kubernetes and Docker, ensuring efficient deployment, scaling, and maintenance of microservices.
- Automated the CI/CD pipeline with Jenkins, significantly reducing deployment times and enhancing the overall development process.
- Employed Infrastructure as Code (IAC) principles with Terraform to provision, configure, and maintain cloud resources, resulting in a more agile and scalable infrastructure.
- Implemented monitoring and alerting solutions using Prometheus, enabling proactive issue detection and resolution in the production environment.

- Demonstrated proficiency in Shell scripting, streamlining and automating regular iterative tasks on UNIX systems.
- Leveraged technical expertise to interface with various tools and platforms, including HP ALM, Sabrix, and MoveIT DMZ, contributing to the seamless operation of critical IT services.

*Used skills* *IT Service Management, Incident Management, Technical Support, Security Enhancement, Shell Scripting, Technical Proficiency*
